

DEEP-AGE SPENT FLOW MONITOR

Transcript of the audio on the Cost Basis Distribution page. Print date 2 October 2026. Age Cohort 5-year-plus spend letter. Window requested ended 2026-10-03. Wording below is the script saved for that clip. It has not been rewritten.

WHAT THIS LETTER IS

DEEP-AGE SPENT FLOW MONITOR (POST-2024-01-03 UNIVERSE ONLY).

15 YEAR+ COINS EXIST ON EVERY DAY IN THIS RANK.

THIS BLOCK IS NOT A 4-CYCLE TOP MODEL, NOT A WALLET SPENT FLOW, AND NOT THE SANCTUM GRID LETTER.

IT ASKS 3 QUESTIONS: HOW MUCH OF THIS DAY'S SPENT BITCOIN CAME FROM COINS ALREADY 5 YEAR+; WHETHER THAT SLEEVE'S UNSPENT PILE SHRANK OR GREW AFTER ACCOUNTING FOR MATURATION; AND IN WHAT PRICE GEOMETRY THAT SPENT FLOW SAT.

THE SLEEVE ON 2 OCTOBER 2026

ON 2 October 2026 SPOT CLOSED AT \$84,841.67.

THE 5 YEAR+ SLEEVE HELD ABOUT 6,747,369 BTC ACROSS ALL 7 COHORTS.

OF THAT, ABOUT 3,171,009 SAT IN 5YR-10YR, ABOUT 1,389,836 IN 10YR-15YR, AND ABOUT 2,186,524 IN 15 YEAR+.

THAT IS THE MUSEUM PLUS THE FIRST DEEP BAND.

THE SAME DAY BTC SPENT / SOLD FROM THOSE 3 BANDS WAS 1,311.36 BTC — 1,241.28 FROM 5YR-10YR, 68.80 FROM 10YR-15YR, AND 1.27 FROM 15 YEAR+.

AS A SHARE OF ALL BTC SPENT / SOLD THAT SESSION, DEEP 5 YEAR+ WAS 0.0967%.

ANCIENT 10YR+ WAS 0.0052%.

15 YEAR+ WAS 0.0001%.

DAY TURNOVER OF THE 15 YEAR+ STOCK WAS ABOUT 0.000058%: LESS THAN 0.0001% OF THE PILE MOVED ON MANY QUIET PRINTS.

WHERE THIS DAY RANKS

THAT 0.0967% (ALL AGE BANDS 5 YEAR+, AS A PERCENTAGE OF ALL BTC SPENT THIS DAY) RANKS AT THE 53RD PERCENTILE OF 1005 POST-2024 SPENT DAYS.

IN THAT SAMPLE THE 10TH PERCENTILE IS 0.0415%, THE MEDIAN 0.0921%, THE 90TH 0.3597%.

A RANK NEAR THE MIDDLE OF THE POST-2024 SAMPLE MEANS THIS DAY WAS BUSIER THAN ABOUT HALF OF THOSE DAYS AND QUIETER THAN ABOUT HALF.

IT IS NOT THE QUIET DECILE AND IT IS NOT A STRESS PRINT.

THIS DAY IS NOT BELOW THE QUIET DECILE OF THAT SAMPLE.

THE MOST RECENT POST-2024 DAY AT OR ABOVE THE 80TH PERCENTILE, ON OR BEFORE THIS PRINT, WAS 25 September 2026, WHEN THE 5 YEAR+ SHARE OF SPENT FLOW WAS 0.2360% AND 2,890.32 BTC OF 5 YEAR+ LEFT THE SLEEVE.

THE MOST RECENT DAY AT OR ABOVE THE 90TH PERCENTILE WAS 3 August 2026, AT 0.3622% AND 3,393.14 BTC.

THOSE DATES ARE CONTEXT FOR THE RANK, NOT A CLAIM THAT THIS DAY REPEATS THEM.

A QUIET SHARE IS NOT ZERO FLOW

OUTPUTS AGED 5 YEAR+ DID MOVE: 1,311.36 BTC LEFT THE DEEP SLEEVE THAT SESSION (1,241.28 FROM 5YR-10YR, 68.80 FROM 10YR-15YR, 1.27 FROM 15 YEAR+).

THAT IS NOT ZERO FLOW.

IT IS A THIN SLICE OF THE SESSION.

THE REST OF THE SPENT FLOW WAS YOUNGER THAN 5YR.

A QUIET PERCENTILE IS: MOST VOLUME WAS NOT OLD, NOT NO OLD COIN MOVED.

THIRTY-DAY STOCK IDENTITY

THE 30-DAY STOCK IDENTITY STOPS A FALSE DISTRIBUTION HEADLINE.

FROM 3 Sep 2026 TO 2 Oct 2026 THE 5 YEAR+ SLEEVE SPENT 33,116 BTC.

UNSPENT 5 YEAR+ STOCK CHANGED BY 6,064 BTC (6,741,305 TO 6,747,369).

IMPLIED AGE-IN FROM COINS YOUNGER THAN 5YR WAS ABOUT 39,180 BTC.

SPEND WAS REAL (33,116 BTC SOLD IN THAT WINDOW).

THE PILE STILL GREW.

GRADUATION MORE THAN REPLACED THE SPENT FLOW.

THAT IS NOT NET LONG-HORIZON DISTRIBUTION AND MUST NOT BE WRITTEN AS NET SELL 27,052." THE IDENTITY IS RUN ON THE COMBINED 5 YEAR+ SLEEVE ONLY.

5YR-10YR, 10YR-15YR AND 15 YEAR+ ARE SPENT FLOW COLOUR.

A FALL IN 5YR-10YR STOCK ALONE CAN BE GRADUATION INTO 10YR-15YR, NOT A SALE.

READ THE SLEEVES APART

READ THE SLEEVES APART.

5YR-10YR COINS ARE THE WORKHORSE OF THIS DEEP SPENT FLOW (94.7% OF THIS DAY'S 5 YEAR+ BTC SPENT).

10YR-15YR AND 15 YEAR+ ARE A TRICKLE AGAINST MULTI-MILLION-BTC STOCKS.

FISH-SCALE 15 YEAR+ ON THE UNSPENT GRID CAN DOMINATE THE MUSEUM WHILE BTC SPENT FROM THAT BAND IS ONLY 1.27 BTC.

CONCENTRATION OF STOCK IS NOT CONCENTRATION OF FLOW.

COHORT MIX

COHORT MIX IS THE 2ND AXIS.

AGE SAYS HOW OLD THE OUTPUT WAS; COHORT SAYS HOW LARGE.

THE ENTIRE 1,311.36 BTC OF 5 YEAR+ SPENT FLOW SAT ACROSS THE SEVEN SQUARES: OCTOPUS 10-50 BTC OUTPUTS SOLD 260.67 BTC, CRAB 1-10 SOLD 170.30, SHRIMP UNDER 1 BTC SOLD 814.86, FISH 65.54, SHARK .00, WHALE .00, HUMPBACK .00.

THIS WAS NOT A WHALE-LED 5 YEAR+ SESSION AND NOT A MUSEUM HUMPBACK.

IT WAS MID-SIZE AND SMALL OLD OUTPUTS ON A QUIET SHARE OF SPENT FLOW.

ADDRESS COUNTS ARE LABELS, NOT ENTITY COUNTS.

DO NOT INVENT A 7-SLICE PIE WHEN SLICES ARE EMPTY.

REALIZED DOLLARS

REALIZED DOLLARS ON WHAT MOVED: 1,311.36 BTC 5 YEAR+ SOLD FOR \$111,257,735 (PNL RATIO 5.53) AGAINST A \$17,036,956 (PNL RATIO 5.53) COST BASIS — REALIZED PNL \$94,220,779 (PNL RATIO 5.53).

IMPLIED SALE $\approx$ \$84,841.67 PER BTC (IN LINE WITH THE \$84,841.67 CLOSE).

IMPLIED COST $\approx$ \$12,991.85 PER BTC.

THESE WERE NOT COINS BOUGHT NEAR THE CLOSE.

15 YEAR+ SOLD 1.27 BTC FOR ABOUT \$107,911 REALIZED PNL — EFFECTIVELY EARLY INVENTORY AT THIS GRAIN.

PROFIT-TAKING ON CHEAP DEEP COIN, IN THE SIZE THAT PRINTED, IS NOT A LOSS-FLUSH AND NOT A TOP-DAY WHALE SPENT FLOW.

TWO ANCHORS BEHIND THE RANK

2 ANCHORS SIT BEHIND THIS DAY'S RANK.

THE NOV-DEC 2024 UPSIDE WINDOW (+32% SPOT, HIGH \$106K) SAW A MEDIAN 5 YEAR+ SHARE OF SPENT FLOW OF 0.185% AND 195,709 BTC OF DEEP BTC SPENT.

15 YEAR+ SOLD 0.

THIS DAY'S 0.097% IS NOT THAT REGIME.

THE 2025 PEAK WEEK IS NOT RETOLD IN THE DAILY OR WEEKLY LETTER.

PRICE CONTEXT IS CYCLE GEOMETRY — 50-DAY, 200-DAY, 50-WEEK, 200-WEEK, BANDS A-E — NOT A SAME-DAY CORRELATION OF SPEND AGAINST THE CLOSE.

ULTRA-LTH PRINTS ARE LUMPY.

A PEARSON COEFFICIENT ON DAILY 5 YEAR+ SHARE VERSUS DAILY GAIN IS NOT A PRODUCT SENTENCE.

PRICE GEOMETRY

WHAT BELONGS IS WHERE SPOT SAT WHEN THE SPENT FLOW MOVED.

ON THIS DAY SPOT AT \$84,841.67 SAT ABOVE THE 50-DAY (\$77,966.31) AND ABOVE THE 200-DAY (\$71,381.17) — NEAR-TERM AND TREND AVERAGES ARE UNDER PRICE.

IT SAT ABOVE THE 50-WEEK (\$78,128.79): THE WEEKLY TREND LINE HAS BEEN RECLAIMED.

AGAINST THE 200-WEEK (\$65,951.06) THE MULTIPLE IS 1.286X.

ON THIS MAP THAT IS BAND_C (1.0X TO 1.5X), MID-CYCLE GEOMETRY, NOT BAND B SUPPORT AND NOT BAND E HEAT.

A QUIET DEEP-AGE PERCENTILE IN THIS BAND, WITH PRICE ABOVE THE 50-DAY AND ABOVE THE 200-DAY AND ABOVE THE 50-WEEK, IS OLD SPENT FLOW INTO A REPAIR / MID-BAND SPENT FLOW — NOT OLD SPENT FLOW INTO A BLOW-OFF AND NOT OLD SPENT FLOW INTO A 200-WEEK TEST.

THAT IS THE OPPOSITE SHAPE FROM THE LOCKED 2025 PEAK WEEK, WHEN SPOT WAS ABOUT 2.3X THE 200-WEEK (BAND E) AND AFTER THE HIGH WHALE-SIZED 5YR-10YR OUTPUTS LED A STILL-NORMAL SHARE OF SPENT FLOW AT LARGE REALIZED PROFIT.

THIS DAY WHALES ARE SILENT IN THE DEEP SLEEVE, THE SHARE OF SPENT FLOW IS IN THE 53RD PERCENTILE, AND THE 200-WEEK MULTIPLE IS 1.286X NOT 2.3X.

WHAT THE LETTER MAY SAY

DO NOT COLLAPSE THOSE 2 DATES INTO 1 LTH HEADLINE.

THE LETTER MAY SAY: QUIET DEEP SPENT FLOW INTO BAND_C, ABOVE THE 200-DAY, ABOVE THE 50-WEEK, 1.286X THE 200-WEEK, LED BY OCTOPUS AND CRAB WHEN THOSE SQUARES DOMINATE, NOT WHALES WHEN WHALE FLOW IS ZERO, AT ~\$13.0K COST AND \$94,220,779 REALIZED PNL ON 1,311.36 BTC.

IT MAY NOT SAY PRICE CAUSED THAT FLOW.

IT MAY NOT SAY: NO BULL-MARKET TOP BECAUSE 15 YEAR+ IS QUIET.

SAY: ON THIS DAY THE DEEP-AGE SHARE OF THE SPENT FLOW WAS AMONG THE 53RD PERCENTILE OF THE POST-2024 SAMPLE; THE 5 YEAR+ PILE STILL EXPANDED OVER THE IDENTITY WINDOW; AND THAT FLOW SAT IN BAND_C WITH SMALL-TO-MID OUTPUTS WHEN THE LARGE SQUARES ARE EMPTY.

THIS DAY AGAINST ALL SPENT FLOW

OF ALL BTC SPENT / SOLD THIS DAY (1,356,577.84 BTC ON THE FULL SPENT FLOW), THE DEEP 5 YEAR+ SLEEVE WAS 1,311.36 BTC.

THAT IS ABOUT 1,034.5 YOUNGER-THAN-5YR COINS FOR EACH DEEP COIN THAT MOVED — THE SPENT FLOW WAS STILL A YOUNG-COIN SPENT FLOW EVEN WHEN THE DEEP SLEEVE WAS NOT ZERO.

THIS DAY'S 5 YEAR+ SHARE OF SPENT FLOW IS ABOUT 1.05 TIMES THE POST-2024 MEDIAN SHARE FOR THIS GRAIN.

A PRINT BELOW 1.00 TIMES THE MEDIAN IS QUIETER THAN THE TYPICAL SESSION IN THE ONLY ERA 15 YEAR+ CAN EXIST; A PRINT ABOVE 1.00 TIMES THE MEDIAN IS BUSIER THAN TYPICAL, NOT AUTOMATICALLY A TOP.

SPOT IS \$18,890.61 FROM THE 200-WEEK LINE IN RAW DOLLARS (PRICE \$84,841.67 VERSUS 200-WEEK \$65,951.06).

THAT DOLLAR GAP IS THE GEOMETRY, NOT A FORECAST.

THE LAST CALENDAR MONTH IN WHICH SPOT TRADED NEAR THIS IMPLIED COST POCKET WAS Nov 2020.

THAT DATE IS A COST-BASIS ANCHOR FOR WHAT MOVED, NOT A CLAIM THAT THOSE COINS WERE BOUGHT ON THAT MONTH'S CLOSE.

OF THE SEVEN COHORT SQUARES IN THE DEEP SLEEVE, 3 PRINTED ZERO.

EMPTY SQUARES ARE A FACT OF THIS PRINT, NOT A MISSING COLUMN.

OF THE UNSPENT 5 YEAR+ PILE, THE 5YR-10YR BAND IS ABOUT 47.0% OF STOCK WHILE IT IS ABOUT 94.7% OF THIS DAY'S DEEP FLOW.

WORKHORSE FLOW NEED NOT MATCH WORKHORSE STOCK.

A HIGH STOCK SHARE IN 15 YEAR+ WITH THIN 15 YEAR+ FLOW IS THE MUSEUM PATTERN, NOT A CONTRADICTION.

THIS WEEK AGAINST ALL SPENT FLOW

OF ALL BTC SPENT / SOLD THIS WEEK (6,139,690.16 BTC ON THE FULL SPENT FLOW), THE DEEP 5 YEAR+ SLEEVE WAS 5,614.90 BTC.

THAT IS ABOUT 1,093.5 YOUNGER-THAN-5YR COINS FOR EACH DEEP COIN THAT MOVED — THE SPENT FLOW WAS STILL A YOUNG-COIN SPENT FLOW EVEN WHEN THE DEEP SLEEVE WAS NOT ZERO.

THIS WEEK'S 5 YEAR+ SHARE OF SPENT FLOW IS ABOUT 1.05 TIMES THE POST-2024 MEDIAN SHARE FOR THIS GRAIN.

A PRINT BELOW 1.00 TIMES THE MEDIAN IS QUIETER THAN THE TYPICAL SESSION IN THE ONLY ERA 15 YEAR+ CAN EXIST; A PRINT ABOVE 1.00 TIMES THE MEDIAN IS BUSIER THAN TYPICAL, NOT AUTOMATICALLY A TOP.

SPOT IS \$18,890.61 FROM THE 200-WEEK LINE IN RAW DOLLARS (PRICE \$84,841.67 VERSUS 200-WEEK \$65,951.06).

THAT DOLLAR GAP IS THE GEOMETRY, NOT A FORECAST.

THE LAST CALENDAR MONTH IN WHICH SPOT TRADED NEAR THIS IMPLIED COST POCKET WAS Nov 2020.

THAT DATE IS A COST-BASIS ANCHOR FOR WHAT MOVED, NOT A CLAIM THAT THOSE COINS WERE BOUGHT ON THAT MONTH'S CLOSE.

OF THE SEVEN COHORT SQUARES IN THE DEEP SLEEVE, 3 PRINTED ZERO.

EMPTY SQUARES ARE A FACT OF THIS PRINT, NOT A MISSING COLUMN.

OF THE UNSPENT 5 YEAR+ PILE, THE 5YR-10YR BAND IS ABOUT 47.0% OF STOCK WHILE IT IS ABOUT 94.7% OF THIS WEEK'S DEEP FLOW, USING THE WEEK TOTAL ABOVE RATHER THAN THE SESSION.

WORKHORSE FLOW NEED NOT MATCH WORKHORSE STOCK.

A HIGH STOCK SHARE IN 15 YEAR+ WITH THIN 15 YEAR+ FLOW IS THE MUSEUM PATTERN, NOT A CONTRADICTION.

THIS MONTH AGAINST ALL SPENT FLOW

OF ALL BTC SPENT / SOLD THIS MONTH (2,530,321.21 BTC ON THE FULL SPENT FLOW), THE DEEP 5 YEAR+ SLEEVE WAS 2,501.53 BTC.

THAT IS ABOUT 1,011.5 YOUNGER-THAN-5YR COINS FOR EACH DEEP COIN THAT MOVED — THE SPENT FLOW WAS STILL A YOUNG-COIN SPENT FLOW EVEN WHEN THE DEEP SLEEVE WAS NOT ZERO.

THIS MONTH'S 5 YEAR+ SHARE OF SPENT FLOW IS ABOUT 1.05 TIMES THE POST-2024 MEDIAN SHARE FOR THIS GRAIN.

A PRINT BELOW 1.00 TIMES THE MEDIAN IS QUIETER THAN THE TYPICAL SESSION IN THE ONLY ERA 15 YEAR+ CAN EXIST; A PRINT ABOVE 1.00 TIMES THE MEDIAN IS BUSIER THAN TYPICAL, NOT AUTOMATICALLY A TOP.

SPOT IS \$18,890.61 FROM THE 200-WEEK LINE IN RAW DOLLARS (PRICE \$84,841.67 VERSUS 200-WEEK \$65,951.06).

THAT DOLLAR GAP IS THE GEOMETRY, NOT A FORECAST.

THE LAST CALENDAR MONTH IN WHICH SPOT TRADED NEAR THIS IMPLIED COST POCKET WAS Nov 2020.

THAT DATE IS A COST-BASIS ANCHOR FOR WHAT MOVED, NOT A CLAIM THAT THOSE COINS WERE BOUGHT ON THAT MONTH'S CLOSE.

OF THE SEVEN COHORT SQUARES IN THE DEEP SLEEVE, 3 PRINTED ZERO.

EMPTY SQUARES ARE A FACT OF THIS PRINT, NOT A MISSING COLUMN.

OF THE UNSPENT 5 YEAR+ PILE, THE 5YR-10YR BAND IS ABOUT 47.0% OF STOCK WHILE IT IS ABOUT 94.7% OF THIS MONTH'S DEEP FLOW, USING THE MONTH TOTAL ABOVE RATHER THAN THE SESSION.

WORKHORSE FLOW NEED NOT MATCH WORKHORSE STOCK.

A HIGH STOCK SHARE IN 15 YEAR+ WITH THIN 15 YEAR+ FLOW IS THE MUSEUM PATTERN, NOT A CONTRADICTION.

SEE MONTHLY LETTER FOR THE 2025 PEAK-WEEK ANCHOR.

CHANGE OF MIX, SEVEN DAYS

OVER THE SEVEN DAYS ENDING THIS PRINT, COINS ALREADY FIVE YEARS OLD OR OLDER CONTRIBUTED 6,269.5 BTC TO THE DAY'S SPENT FLOW.

THAT SLEEVE WAS CARRIED AS FOLLOWS.

SHRIMP, UNDER ONE BTC, TOOK 40.1 PERCENT.

CRAB, ONE TO TEN BTC, TOOK 21.9 PERCENT.

OCTOPUS, TEN TO FIFTY, TOOK 20.1 PERCENT.

FISH, FIFTY TO ONE HUNDRED, TOOK 16.0 PERCENT.

SHARKS, ONE HUNDRED TO ONE THOUSAND BTC, TOOK 1.8 PERCENT.

WHALES TOOK 0.0 PERCENT.

HUMPBACKS TOOK 0.0 PERCENT.

THE PRIOR SEVEN DAYS MOVED 11,075.5 BTC, WITH SHRIMP AT 11.1 PERCENT, SHARKS AT 47.1 PERCENT AND WHALES AT 13.5 PERCENT.

THE HANDOFF IS THE FACT.

THE PRIOR SEVEN DAYS WERE CARRIED BY SHARK-SIZED AND WHALE-SIZED OLD OUTPUTS, AND THESE SEVEN DAYS WERE CARRIED BY SHRIMP, CRAB AND OCTOPUS.

DEEP SPEND CHANGED SIZE, AND THE COINS THAT STILL MOVED STOPPED ARRIVING AS LARGE SQUARES.

A QUIETER SHARK WEEK WOULD STILL HAVE BEEN A SHARK WEEK.

THIS WAS A HANDOFF TO SMALL AND MID-SIZE OLD OUTPUTS, NOT A SMALLER COPY OF THE SAME MIX.

CHANGE OF MIX, SLEEVE AND COST

THE AGE SLEEVE DID NOT HAVE TO ROTATE WITH THE COHORT.

A SHIFT FROM LARGE SQUARES TO SMALL SQUARES CAN HAPPEN INSIDE THE SAME FIVE-TO-TEN-YEAR BAND, AND A SHIFT OF AGE BAND CAN HAPPEN WITHOUT A SHIFT OF COHORT.

THIS WINDOW WAS 89.4 PERCENT FIVE-TO-TEN-YEAR, 9.8 PERCENT TEN-TO-FIFTEEN-YEAR, AND 0.8 PERCENT FIFTEEN-YEAR-PLUS.

THE PRIOR WINDOW WAS 87.5 / 12.3 / 0.1 PERCENT.

IMPLIED COST ON THIS WINDOW WAS ABOUT \$15,964 A COIN, AGAINST A SALE NEAR \$83,990 AND REALIZED PROFIT OF \$426,486,908.

THE PRIOR WINDOW CLEARED AT ABOUT \$14,360 AGAINST A SALE NEAR \$84,088 AND REALIZED PROFIT OF \$772,266,001.

THE SALE PRICE IS THE STABLE LEG.

THE COST BASIS ROSE, SO EACH BITCOIN THAT LEFT THREW OFF LESS PROFIT THAN THE PRIOR WINDOW, EVEN WHERE THE SALE PRICE HARDLY MOVED.

THESE ARE STILL NOT COINS BOUGHT ON THE 2024-25 RUN UNLESS THE IMPLIED COST ITSELF SITS NEAR THE SALE.

THE LAST THIRTY DAYS MOVED 33,115.9 BTC OF FIVE-YEAR-PLUS, AGAINST 35,729.0 BTC IN THE THIRTY DAYS BEFORE.

THAT THIRTY-DAY PILE WAS 81.9 PERCENT FIVE-TO-TEN-YEAR AND 2.5 PERCENT FIFTEEN-YEAR-PLUS, AT AN IMPLIED COST OF ABOUT \$14,371.

FIFTEEN-YEAR-PLUS CAN BE IN THE SPENT FLOW WITHOUT BEING THE SPENT FLOW.

CHANGE OF MIX, DRIP VERSUS BURST

HUMPBACK OUTPUTS WERE ZERO ON 30 OF THE LAST 30 DAYS.

FIFTEEN-YEAR-PLUS WAS ZERO ON 3 OF THOSE DAYS, WHICH MEANS THE MUSEUM BAND CAN PRINT ON MOST SESSIONS AND STILL BE A RESIDUE OF THE MONTH BITCOIN.

PRESENCE IS NOT WEIGHT.

A BAND CAN PRINT ON MOST DAYS AND STILL BE ONLY A RESIDUE OF THE MONTHLY BITCOIN.

READ THE MONTH FROM THE CARRIER CHANGE ABOVE, NOT FROM A SINGLE SESSION.

THIS IS NOT A THIRTY-DAY DISTRIBUTION REGIME BY DEFAULT, AND IT IS NOT A FIFTEEN-YEAR EXIT UNLESS THE FIFTEEN-YEAR SHARE ABOVE SAYS SO.

COHORT BANDS ARE OUTPUT SIZE, NOT ENTITIES.

RAW BITCOIN RANK

THE LAST CLOSED SESSION, 2 October 2026, IS THE RANK 225 5 YEAR+ DAY IN THE SAMPLE: 1,311.36 BTC, RANK 225 OF 1,005, AND ONLY 0.0967% OF THAT DAY'S SPENT FLOW.

THAT IS THIS SESSION'S PLACE ON THE RAW-BITCOIN BOARD, WHICH IS NOT THE SAME OBJECT AS THE SHARE-OF-SPENT-FLOW PERCENTILE ABOVE.

THE TOP OF THE BOARD IS NOT A CLUSTER OF SIMILAR DAYS.

28 May 2024 PRINTED 142,346 BTC, 14.03% OF THAT DAY'S SPENT FLOW, AND IS 1.8 TIMES THE SECOND DAY, 4 July 2025 AT 80,398 BTC AND 14.39% OF SPENT FLOW.

AFTER THOSE TWO, THE BOARD DROPS HARD: 16 January 2024 AT 50,197 BTC, 23 January 2025 AT 34,478 BTC, THEN A BAND OF EARLY SESSIONS BETWEEN THE FIFTEENTH-LARGEST AND THE FIFTH-LARGEST DAY.

12 OF THE FIFTEEN LARGEST DAYS ARE IN 2024, AND 12 OF THOSE ARE BEFORE SEPTEMBER.

THE QUIET TAIL IS A DIFFERENT OBJECT.

THE FIFTEEN SMALLEST CLOSED DAYS RUN FROM 57 BTC TO 131 BTC, AND THEIR SHARE OF SPENT FLOW STAYS BETWEEN 0.014% AND 0.032%.

A SMALL RAW PRINT AND A SMALL SHARE DO TRAVEL TOGETHER AT THIS FLOOR.

THEY DO NOT TRAVEL TOGETHER AT THE TOP: SEVERAL RANK-5 TO RANK-15 DAYS CARRIED 1.3% TO 3.7% OF SPENT FLOW, NOT THE SHARE OF THE TWO SPIKES.

THE LETTER CAN SAY THIS SESSION IS RANK 225 OF 1,005 BY RAW 5 YEAR+ BITCOIN SINCE 3 JANUARY 2024.

IT MUST NOT TREAT THE SAMPLE HIGH AS A NORMAL PEAK.

THAT DAY IS AN OUTLIER SITTING ON TOP OF A MUCH LOWER CLUSTER.

PEAKS AND TROUGHS

ON THE DAY, 2 October 2026 IS A PEAK.

THE LAST LOCAL PEAK WAS 29 September, AT 1,340.15 BTC, RANK 217 OF 1,005.

THE ONE BEFORE WAS 25 September AT 2,890.32 BTC, RANK 93, AND THE ONE BEFORE THAT WAS 22 September AT 1,990.22 BTC, RANK 137.

THE LAST LOCAL TROUGH WAS 1 October AT 1,132.93 BTC, RANK 285, THEN 26 September AT 306.52 BTC, RANK 873, THEN 23 September AT 1,301.19 BTC, RANK 228.

THOSE LABELS ONLY MEAN THE SESSION WAS HIGHER OR LOWER THAN THE DAY BEFORE AND THE DAY AFTER.

THE SAMPLE HIGH REMAINS 28 May 2024.
